II.8.2. For those issues that are typically included in external QA evaluation, please provide details on the criteria used. Please also provide the full reference to relevant documents

As far as teaching is concerned, the external quality assurance agencies evaluate the learning resources of the programme which include the infrastructure, the supporting of the programme, the suitability of the qualifications of the academic staff, the teaching methods as well as the student satisfaction.

Research is also evaluated on how actively the academic staff is involved in research. Publications in refereed journals are taken into consideration along with the participation of the academic staff in

seminars and conferences.

Regarding student support services, the agency evaluates how effectively students are supported throughout their studies (i.e. pastoral care, accommodation and job finding services).

The admission processes are also evaluated. The external evaluators both assess the width of student access at the university and measure the social dimension of the university.

The public and private universities of Cyprus have developed their own internal quality assurance processes. The private universities are obliged to do so according to the Private Universities Law. This policy includes processes of evaluating the competence of the academic staff, the student satisfaction, the programmes of study as well as the prospect of developing new programmes of study.
