10:15 – 10:30	<p><b>Introduction to Workshops 1-3 on indicators for social dimension using the World Café Method</b></p> <p>Three subgroups have created a first draft of indicators for each Principle for social dimension. Each subgroup has created approximately 10 indicators for each principle for social dimension. What approach to indicator creation has each group taken and why? What type of indicators has each subgroup created: Qualitative, quantitative, multidimensional or combinations thereof?</p> <p>What is the relation between the subgroups' indicators and indicators created by Eurydice (survey and report "<a href="#">Towards Equity and Inclusion in Higher Education in Europe</a>")? How are our indicators going to help public authorities implement the principles for social dimension? Do we have a sufficient number of indicators per principle, and do they cover all aspects of the social dimension included in that principle? Are the indicators sufficiently SMART (specific, measurable, achievable, relevant, time-bound)?</p> <p>We are going to organize a structured conversation to discuss these questions in three rounds by using the World Café Method, explained below in the agenda.</p> <p><i>Presenter: Nino S. Schmidt (Croatia)</i></p>
