BFUG9 8a

“Joint Degrees – A Hallmark of the European Higher Education Area ?“

Draft Summary and Conclusions

Under the auspices of the German Rectors Conference (HRK)\(^1\) and the German Academic Exchange Service (DAAD)\(^2\) and co-financed by the European Commission, Directorate-General for Education and Culture\(^3\), an official Bologna-Seminar\(^4\) on questions and strategies related to the awarding of “Joint Degrees” in the European Higher Education Area (EHEA) was held on September 21-22, 2006 in the Ludwig-Erhard House\(^5\), Berlin.

**Mandate.**
The ministers responsible for higher education of the 45 Bologna member states gave the following mandate for this Bologna seminar in their Bergen Communiqué\(^6\) under chapter IV which is entitled “Taking stock on progress for 2007”. In this chapter they said: “..In particular, we shall look for progress in: ..- the awarding and recognition of joint degrees, including at the doctorate level.”

**History.**
There is already a “joint” history of endeavours to clarify what joint degrees are and how they could best be put into practice. This history has to be taken into account. This concerns primarily the Stockholm Conclusions of May 31, 2002\(^7\), the final report on the Mantova Seminar of April 11-12, 2003\(^8\) and the Stockholm Seminar “Joint Degrees – Further Development” of May 6-7, 2004\(^9\). The Stockholm 2002 Conclusions make an explicit reference to the Lisbon Recognition Convention of 1997\(^10\) on the recognition of degrees and study phases in higher education with a proposed amendment to include joint degrees dating from 2004.\(^11\)

8\) Ministero dell’Istruzione, dell’Universita e della Ricerca: Seminar on „Integrated Curricula – Implications and Prospects“, Final Report, Mantova, 11-12 April 2003
In the Bergen Communiqué the ministers state under the chapter “recognition of degrees and study periods”:

“…We express support for the subsidiary texts to the Lisbon Recognition Convention and call upon all national authorities and other stakeholders to recognise joint degrees awarded in two or more countries in the EHEA.”

The Stockholm 2002 Conclusions also contain a list of 9 criteria which could be useful as common denominators for the design of joint (or integrated) study programmes (this list is very much compatible with the criteria that TAUCH and RAUHVARGERS listed in their survey on Master Degrees and Joint Degrees).

Three of these nine criteria should be mentioned here again, namely:

- the duration of study outside the home institution should be substantial, e.g. 1 year at bachelor level
- joint study programmes require to be settled on by cooperation, confirmed in a written agreement, between institutions
- full use should be made of the Diploma Supplement (DS).

From the Mantova Final Report, two statements might be worth being highlighted:

“..Joint degree programmes based on integrated curricula are one of the major priorities for the building of a European identity” (including cultural, linguistic and social aspects) and

“..Joint doctoral programmes educating for research professions in Europe are a cornerstone for greater co-operation between the European Higher Education Area (EHEA) and the European Research Area (ERA). Synergy between the two areas is viewed as an essential prerequisite for the creation of a Europe of Knowledge.”

The Stockholm 2004 Report and Conclusions stress the need to map the experience of higher education institutions and students and to anchor the possibility of awarding joint degrees in the national legislation on higher education.

The discussion in this Berlin Seminar showed that it might be useful to distinguish more precisely between joint or integrated study programmes as a procedural work on the one hand and the awarding of a degree that recognises and reflects the new contents and the added European value on the other hand.

Nevertheless, there are already some definitions what a joint degree is or in which framework it can be defined.

We have definitions of this kind on the Bologna-Bergen homepage, of the Council of Europe (CoE) and UNESCO in the framework of the Lisbon Recognition Convention and of ESIB (these definitions are wider) and one by the EASMUS-MUNDUS-Programme (which is narrower and closer to a “true” joint degree of the one certificate or –diploma type). There are also additional definitions or descriptions by non-governmental organisations of which one should be mentioned. This one is from the “Consortium of International Double Degrees (CIDD)” located in Paris and they just issued a 48-pages paper on “Joint and Double Degrees within the European Higher Education Area” which is worth reading.

The problem with these definitions is that they are somewhat contradictory, but that unfortunately our ministers – at least indirectly – already “nodded” to all of these definitions.

Since there are evidently some fears in some countries of too narrow definitions of joint degrees to insert in their national legislation, the advice might be to start with a wider definition of the Lisbon/Unesco/CoE-type. The important thing is that ministers engage to make the necessary legal steps to allow the awarding of joint degrees in their respective national legislation.

The Lisbon/Unesco/CoE-definition of a joint degree is:

“... A joint degree should be understood as referring to a higher education qualification issued jointly by at least two or more higher education institutions or jointly by one or more higher education institutions and other awarding bodies, on the basis of a study programme developed and/or provided jointly by the higher education institutions, possibly also in cooperation with other institutions. A joint degree may be issued as:

- a joint diploma in addition to one or more national diplomas
- a joint diploma issued by the institutions offering the study programme in question without being accompanied by any national diploma,
- one or more national diplomas issued officially as the only attestation of joint qualification in question.”

It might perhaps be useful to compile the legal provisions for joint degrees of those countries which already have them and to present them to all ministers, perhaps with a brief additional (juridical) comment. This would be a task to be initiated by the Bologna Follow-up Group (BFUG).

During the Berlin Seminar, five working groups discussed specific aspects of the overall topic “Joint Degrees”. These working groups were:

1. Recognition
   (Chair: Dr. Peter Zervakis (HRK); rapporteur: Christine Scholz (ESIB, Germany))
2. Quality Assurance
   (Chair: Stefan Bienefeld (HRK); rapporteur: Nina Gustafsson Aberg (ESIB, Denmark))
3. Designing Legal Frameworks
   (Chair: Dr. Amelia Hadfield (University of Kent/UK); rapporteur: Beata Skibinska (National Socrates Agency, Poland))
4. Mobility
   (Chair: Dr. Siegbert Wuttig (DAAD); rapporteur: Prof. Volker Gehmlich, (University of Applied Sciences, Osnabrueck, Germany))
5. Financing and Funding
   (Chair: Prof. Maria Sticchi Damiani (Free International University of Social Studies, Rome, Italy); rapporteur: Shirley Pollack (The Danish University of Education, Copenhagen, Denmark)).

The meeting agreed on the following conclusions and recommendations to the ministers concerned:

(1) There is already evidence that joint (integrated) programmes contribute largely to the building of a European identity of a specific, higher-education-related kind. They combine international experience, enhanced linguistic, cultural and social competence. If these contributions to the coherence of a European Higher Education Area (EHEA) are really valuable and appreciated, there must be some kind of specific funding for them either on the national or on the European level or perhaps even as a combination of the two.

This request is justified because – at least in the initial phase – there are additional (overhead) costs that are specific to such programmes. On the other hand, there is an added value of these programmes and in the long run and with more experience gained, there could even result less costs or greater capacity options by the (international) pooling of resources.
(2) Competent authorities at the national and the European level should be asked to compile a survey and description of existing double-, multiple- and joint-degree programmes to better illustrate what these programmes are and what their European value both in terms of academic world-competitive education and of employment perspectives are. Such studies could be initiated simultaneously at the national and the European level. It would be an advantage if they were available for the next ministerial conference in London in May 2007, with German EU-presidency at that time.

(3) There is a rather broad consensus on what the necessary criteria for the design and development of integrated European (joint) programmes are. There could probably even be a final list of “good criteria” (or “golden rules” as the European University Association (EUA) put it) that can be derived from the Stockholm, Mantova and Berlin Seminars and other documents cited in this connection. Such a document should then be published as a Bologna document of reference and relevance.

(4) In the case of legal definitions of a “true” joint degree this is not the case (no broad consensus) and it may be difficult to achieve it with a formula that covers all aspects from Albania to Russia, EU and Non-EU… Perhaps this is not even necessary. All ministers whose countries have already ratified the Lisbon Recognition Convention (these are 39 at the time being) have at least in general agreed to the formulation chosen for the Lisbon Subsidiary Documents14 of Unesco and the Council of Europe (which is a broader one for the design and description of joint integrated programmes). Therefore, the ministers are asked to incorporate in their national legislation on higher education at least the written option for the awarding of joint degrees with a reference to the Lisbon Convention descriptions and making sure that they are quality-assured according to national standards and European principles and guidelines already agreed upon.

In addition to legal provisions allowing for joint degrees it is also of utmost importance to make extensive use of a precise and informative Diploma Supplement (DS). It could also be possible to combine the single or multiple diploma document with a “joint” diploma supplement in such a way that the different parts or sheets cannot be separated any more as is practice in the juridical area and with certain contracts.

In the meantime, the ministers should encourage institutions to continue and enhance their work for the preparation and design of integrated joint programmes.

(5) Ministers should encourage institutions engaged in joint study programmes to make use of mutual waiver-arrangements for tuition fees and study periods spent in the foreign partner institution.

(6) The ministers are asked to talk with their respective government colleagues to make sure that the procedures for the attainment of visa and other necessary documents or permissions will not produce obstacles for the development of joint study programmes.

(7) Progress in the development of European principles and guidelines for quality

---

assurance and in the co-operation of QA-agencies from different European countries is indispensable also for progress in the field of joint study programmes and their reputation on the world education market.
