## Revision of the Procedures for Applications

9. The Register Committee revised the EQAR Procedures for Applications, based on its experience from the past four years and in order to implement some of the recommendations made by the international expert panel that reviewed EQAR externally in 2011.

10. Most notably, all decisions by the Register Committee on eligible applications for inclusion on the Register will be published as from now.

11. Furthermore, the eligibility requirements and the process for renewal of registration were clarified, along with a range of smaller clarifications.

12. The criteria for inclusion on the Register remain unchanged, i.e. substantial compliance with the European Standards and Guidelines for Quality Assurance (ESG) is required to be included on the Register.
